# TA Turn

TAConnections

Meet TA Turn from TA Connections: a fully integrated solution delivering real time transparency into every aircraft turnaround.

TA Turn actively monitors tasks and associated actions with every flight arrival and departure to ensure optimal on time performance (OTP). Let TA Turn advise you when your OTP is at risk of being impacted.

TA Turn Intelligently Tracks Turn Phases

Tracks tasks by three essential phases - arrival, departure or turnaround. This delivers quick updates on the key status of any phase of the turnaround.

Smart Automation

Integration with multiple systems including your PSS, DCS and Flight operations system means the majority of tasks are then monitored and actioned automatically. TA Turn monitors tasks both above and below the wing.

Real-Time Alerts

TA Turn pushes real-time alerts to your agents when any task is delayed. Detect issues quicker and improve your on time performance.

Turn Sheet Options

Create a turnsheet that is tailored to your operation.

• Domestic or international

• Narrow body or wide body

• Country, station or airport specific

True Flexibility

TA Turn can be accessed via a web browser as a stand alone app, native iOS app or through our complementary platforms TA Airport and TA Ramp.

Turnaround Intelligence

Use the data captured in TA Turn to improve and streamline your turnaround processes. TA Turn gives you the data to be smarter about your turnaround management. Improve your OTP with TA Turn.

Our Complete, End-to-End Airline Solutions

TA TURN

Real-time visibility of all turn tasks to improve on time performance. Alerts for any delayed turn task that can impact on time departure. Flexible Turn access from either iOS native app or browser.

TA CREW

Automation of the crew layover process and a digital cabin with integrated point of sale

TA RAMP

Digital Baggage Reconciliation with real time operational information

TA DISRUPTION HUB

Proactive, digital disruption management with a focus on passenger self service

TA AIRPORT

Mobile DCS to transform your airport operation and improve the passenger experience

TA INFLIGHT

Enhanced flight service with a digital cabin and integrated POS to grow inflight retail revenue
