

Smarter, Digital, Mobile & Connected.

A truly mobile Departure Control System to transform your customers' airport experience.

### Break free from the counter

In every airport today, airline agents can only assist passengers from the counter or via a self-service kiosk. TA Airport will mobilize your workforce and completely change how your agents interact with passengers with a feature-rich mobile Departure Control System (DCS) app allowing your agents to roam.

TA Airport seamlessly integrates with all core airline systems to become a powerful mobile extension of your DCS. TA Airport supports check-in, both domestic and international, boarding, ancillary sales with quick payment options, passport capture via camera, digital boarding passes

and mobile bag tags and much more. TA Airport streamlines the entire airport process from start to finish.

### No lines to hold you back

Customer resolution becomes effortless, allowing your agents to go directly to your customers. Manage disruption booking and missed connections, process refunds and generate vouchers from any location. All without touching any airport infrastructure.

### Increase ancillary revenue

Our customers have increased their ancillary revenue by 1/3 now they are no longer restrained by fixed infrastructure and legacy systems. With multiple payment options, fast

transition times including contactless payments, TA Airport is ready for you to grow your airport ancillary revenue.

### Real-time data at your fingertips

Built around an On-Time Performance ("OTP") dashboard providing real-time check-in, boarding and flight information, communication across the airport is significantly improved with operational information at your fingertips. Even access TA Turn, our integrated turnaround management solution from within the TA Airport application for even more operational improvements.

**Let TA Airport transform your airport operation today.**

## Benefits

### IMPROVED AIRPORT EFFICIENCY

The TA OTP dashboard removes the need to manually monitor airport activity, creating operational efficiencies, improving communication and increasing staff productivity.

### HIGHER REVENUE

Airlines now have the ability to capture previously untapped revenue opportunities before passengers board their flights, such as additional gate bag checks and other ancillary products and services.

### REDUCED AIRPORT FOOTPRINT

TA Airport, supported by mobile payment and printing peripherals, allows our customers to reduce their airport footprint and decrease costs.

### ENHANCED CUSTOMER SERVICE

Transform how your agents interact with passengers and deliver true service differentiation across every airport touchpoint or add new services such as off-airport mobile check-in and bag drop at cruise ship or hotel.

### FLEXIBLE INTEGRATION & CONNECTIVITY

With several integration options such as Timatic or ICTS for passport and visa checks, multiple payment providers and the ability to operate on any 4G/5G network, TA Airport delivers true flexibility.

## Our Complete, End-to-End Airline Solutions

TA Airport creates a digital and mobile airport operation to reduce your reliance on airport infrastructure. Streamline your entire airport operation and facilitate digital and contactless touchpoints to grow ancillary revenue and improve passenger service.

Automation of the crew layover process and a digital cabin with integrated point of sale

Digital Baggage Reconciliation with real time operational information

Proactive, digital disruption management with a focus on passenger self service

Real-time visibility, alerts, and flexible access to all turn tasks

Enhanced flight service with a digital cabin and integrated POS to grow inflight retail revenue
