

Smarter. Digital. Mobile. Connected.

TAConnections

Improve cabin crew productivity, personalize your passenger experience, and increase ancillary revenue with TA Inflight, a software that creates a digital cabin.

True Digital Cabin

TA Inflight creates a digital cabin for your crew to improve productivity and streamline the inflight operation. TA Inflight delivers in-depth passenger information, including booking information and passenger profiles, for an enhanced, more personal inflight service.

A Single Digital Source of Truth

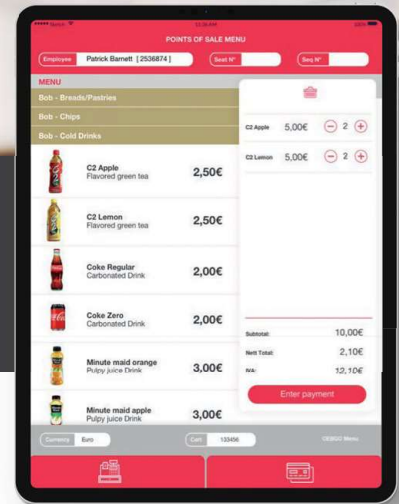

TA Inflight brings all the information your crew needs into a single application. Access manuals and checklists, manage crew checks and training, and make your reporting digital,

including seamless integration to multiple on-ground systems for real improvements.

TA Inflight can take your in-flight service and crew productivity to new heights.

Increase In Flight Revenue

Drive inflight revenue skyward with our integrated retail solution that automatically ties in-flight sales to the passenger for future personalization and customer service benefits. Our smart Retail Point of Sale (POS), with multiple payment options and quick transactions, can increase your revenue.

Build Customer Loyalty

Empower your crew with the information and tools to resolve service issues in the cabin at first touch. Actions and tasks performed in TA Inflight are captured and delivered securely to your chosen CRM or data warehouse on landing. This valuable data can increase passenger service success and operational improvements.

It's time to transform your inflight experience with TA Inflight.

Benefits

IN-FLIGHT REVENUE GROWTH

Our smart retail POS solution supports personalized offers, reduces transaction times and drives in-flight ancillary revenue or view any passengers pre-ordered meals for any cabin.

IMPROVED COMMUNICATION

With seamless integration to several systems, TA Inflight streamlines communication between crew and with other airline teams on the ground.

DIGITAL CABIN

A true digital cabin replaces time-consuming paper-based and manual tasks, removing friction points from in-flight operations, while access to real-time information helps crews work more efficiently.

SUPERIOR SERVICE

With access to rich passenger information, your crew can deliver improved customer service and a better flight experience.

Our Complete, End-to-End Airline Solutions
